

A Solid Foundation for Care

BuildUp Oregon is on a mission to preserve, improve, and expand child care facilities throughout the state of Oregon.

Provider-Centered Assistance

Expert Guidance

The technical aspects of a construction or renovation project can be overwhelming, particularly when combined with the all-consuming work of caring for and educating young children. We're committed to helping providers navigate administrative and regulatory hurdles.

Grants

Funding for facilities is crucial to meeting our ambitious goals for improving the quality and accessibility of early care and education options throughout Oregon.

Loans

Due to the limitation of grant funding, some projects may qualify for financing to cover costs ranging from construction to furnishing. These are loans specifically designed for child care borrowers, with flexible terms and fixed, accessible interest rates.

Who Qualifies for Assistance

Family Child Care Providers

Licensed providers operating one or more early care and education programs out of a private residence.

Child Care Centers

Providers running or looking to open an early care and education programs within a commercial space.

Affordable Housing Developers

Affordable housing developers who are looking to partner with a provider and build commercial or residential space specifically designed for child care into their projects.

Types of Projects That Qualify

Renovation & Repair

Physical construction, improvements, and renovations that increase or preserve a family child care or child care center's quality and capacity.

Pre-Development

Costs associated with the lead-up to a new early care and education facility, including consultants, architects, permits, feasibility studies, and more.

Center Development

Costs associated with the physical development of a new early care and education facility, including site acquisition, construction, project managers, and more.
